

Pediatric Home Service (PHS) is a full-service, independent pediatric home care company providing specialized health care services to technology-supported children in their homes. PHS coordinates and manages all the services, medication and equipment needed to provide patients with the treatment and care they need in a safe home environment. Committed to taking care of the child, the company partners with health care professionals and family caregivers to ensure patient receives the same quality of care at home that is delivered in a hospital setting.
