

Pediatric Home Service Biography

Susan Wingert
President

Susan Wingert, President of Pediatric Home Service, founded the independent pediatric homecare company in 1990. As President, Wingert heads the Twin Cities leading pediatric home health care organization. A respiratory therapist by training, Susan has thirty years experience in respiratory care and clinical services.

Pediatric Home Service (PHS) provides specialized health care services to technology-supported children in their homes, with their families. PHS takes care of the child by recognizing and understanding the differences between the needs of infants, children, and adolescents. PHS works together with health care professionals, payers, and family caregivers – ensuring the continuity of care, one child at a time.

Prior to founding PHS, Wingert, a graduate of St. Catherine's, St. Paul, MN (formerly St. Mary's), held sales and director positions within home health care organizations including Glasrock Home Health Care, Travenol Home Respiratory, and Waconia Ridgeview Hospital.
