

## At home with cost savings

*Treating children with medical complexities at home significantly reduces the cost to provide care.*

### Hospital vs. Home Care

*We care for children with medical complexities at home for a fraction of the cost of hospitalization. The data demonstrates per day costs based on Medicaid reimbursement. Simply put, ensuring access to adequate home care is a smart health care investment.*

## **PEDIATRIC HOME CARE IS MODERN MEDICINE**

**Thirty years ago, home care for medically fragile children wasn't an option.** Today, we have the technology, equipment, and clinicians to best care for complex pediatric patients, but we can't stop there.

**We must continue to evolve health care legislation** to ensure resources are put toward providing the best **comprehensive and integrated care** for patients. We have the opportunity to advance care while reducing overall cost.

## **MODEL FOR A PEDIATRIC COMPLEX CARE DESIGNATION**

### **Clinical excellence:**

- Pediatric-trained staff who have completed the highest certifications available
- Comprehensive services for continuity of care

### **Technical abilities:**

- Certified biomedical technicians support all medical equipment
- Electronic charting with online access for families and integration with other providers

### **Service focused:**

- Patient and family centered care
- Education for families and the health care community to ensure competent care for all PHS patients.
