FOR IMMEDIATE RELEASE

Online Education Enhances Learning for Clinicians Courses Create Efficiencies for Learners and Educators

St. Paul, Minn. – [Pediatric Home Service](#) (PHS) started creating [online courses](#) for clinicians in 2014, with the creation of [IV Basics](#). Since then, the course selection has evolved and the home care company now offers five online courses, and is currently in the process of creating more. The goal of online education is to reduce in-person training time and to create efficiencies for both the learner and educators. Online education also gives learners the opportunity to take the course anywhere, allowing access for clinicians across the country to PHS’s advanced, interactive and engaging courses with content specifically geared to the medically complex population.

PHS’s online courses are developed to meet the needs of the online learner. Courses can be taken at a time convenient to the participants schedule and in the comfort of their own home. For learners near PHS headquarters, additional lab opportunities are offered to enhance the online training with hands-on classroom work.

“It’s a really amazing time to be in health care,” said Jean Stumpf, PHS Education Department Project Manager and Subject Matter Expert, “With advancements in technology we can now safely and effectively train health care professionals using online education, something we weren’t able to do years ago.”

PHS currently offers [Blood Sampling](#), [Caring for an Implanted Port](#), [Enteral Basics](#), [IV Basics](#) and [Trach Tube Essentials](#) as online courses. Respiratory Equipment Basics is being released in April 2019 and Airway Clearance in the summer of 2019.

Stumpf will be presenting a case study on creating online education at the [National Home Infusion Association \(NHIA\) Annual Conference](#) on March 13, 2019. Additionally, PHS Director of Nursing, Michelle Curley, will be facilitating conversation at a roundtable presentation on a recent central line study. The 2019 NHIA Annual Conference is March 9-13 in Orlando, FL.

About Pediatric Home Service

Based in St. Paul, Minn., with an office location in Pewaukee, Wisc., Pediatric Home Service is an independent pediatric home care company that helps children with medical complexities and technology dependencies live safely and successfully where they’re most comfortable, at home with their families, rather than in a hospital. Pediatric Home Service has been partnering with health care professionals and family caregivers for nearly three decades to deliver compassionate, specialized, high-quality care to children with special medical needs.
