INSIDE THIS ISSUE

One Year In Milwaukee

PLUS:

New in-network payer, enteral nutrition inventory to meet the needs of all patients, and how PHS ensures a safe care plan for rural patients.

One Year in Milwaukee

THANK YOU FOR CONTINUED PARTNERSHIP

It's hard to believe that we've already reached our first birthday in Wisconsin.

During this time we developed new partnerships within the

healthcare community, met inspiring patients who are some of the strongest people we know, and worked alongside parents and caregivers to understand their needs and concerns while providing training to help ensure success at home.

What a year it's been – while it's impossible to recap all that has happened over 365 days in one message, there are a few moments and highlights that stand out for this team, including:

- Helping more than 250 patients receive comprehensive care at home.
- The addition of two new employees.
- Being able to give back through local community non-profits.

Thank you for trusting PHS to care for your patients at home.

PHS Expands List of In-Network Payers NEW CONTRACT IN PLACE

We are thrilled to be able to expand our access to help medically complex patients transition home by continuing to add in-network health insurance providers.

PHS is now an in-network provider for:

- **Security Health**

At PHS, we believe that kids live better at home. Continually working to expand our partnerships with new payers is one way we can bring compassionate, detailed, clinically excellent care to more patients.

For more details on these two new payer contracts or any other insurance provider, contact us at 414-323-8747.

Enteral Nutrition for Healthy, Happy Kids REGIONS LARGEST INVENTORY

Many of the patients that PHS serves have rare diagnoses and complex conditions that commonly require specific nutritional needs. Additionally, we understand that kids' nutritional needs change as they grow. In order to best support this population, we carry an inventory of over 150 standard, semi-elemental, and elemental products.

We have the region's largest supply of formula and supplements on-site to be able to meet your patient's specific needs.

Patients receiving enteral formula from PHS may also use other services as part of their comprehensive care plan. We offer a variety of equipment and supplies for nutrient delivery, including food pumps, gravity feeding bags, and syringes.

Contact Krista today at 414-331-8725 for information on our enteral services or visit [phsonlineordering.com/formula](https://www.phsonlineordering.com/formula) for a complete list.

Ensuring Safe Care Plans Across the State SAFETY FOR RURAL PATIENTS

When we first opened our doors nearly 30 years ago, the idea of bringing home kids with medical complexities was revolutionary. Since then, the industry has grown by leaps and bounds, but our standards for patient safety remain just as high as they were the very first day.

Today, we continue to safely support patients across the state with highly complex medical needs through careful planning, and detailed training.

A few key elements to keeping rural patients safe include:

- Highly credentialed, experienced clinicians
- Backup units for life-sustaining equipment
- 24/7 clinician availability
- Extensive education before, during and after discharge
- Video and phone troubleshooting calls
- Emergency backup bag
- Variety of delivery options
